

Subject: Title 2, Net Neutrality

San Francisco  
Nov 23rd 2017

To whom it may concern at FCC

I support Title 2 oversight of ISPs and I support net neutrality. Broadband internet access is, at its core, a public utility and service. Treating it any differently would be cause for extreme negative impact for the industry and the consumers devastating to the broader economy. Internet access is a basic human right. Net neutrality must be maintained if we are to have a fair, open, meritocracy-based society that can compete with the rest of the world.
